Translation of the original Operating Instructions

Information about these operating instructions

Welcome to OASE Living Water. You made a good choice with the purchase of this product **Vitronic**.

Prior to commissioning the unit, please read the instructions of use carefully and fully familiarise yourself with the unit. Ensure that all work on and with this unit is only carried out in accordance with these instructions.

Adhere to the safety information for the correct and safe use of the unit.

Keep these instructions in a safe place! Please also hand over the instructions when passing the unit on to a new owner.

Symbols used in these instructions

The symbols used in this operating manual have the following meanings:

Risk of injury to persons due to dangerous electrical voltage

This symbol indicates an imminent danger, which can lead to death or severe injuries if the appropriate measures are not taken.

Risk of personal injury caused by a general source of danger

This symbol indicates an imminent danger, which can lead to death or severe injuries if the appropriate measures are not taken.

Important information for trouble-free operation.

A Reference to a figure, e.g. Fig. A.

→ Reference to another section.

Product Description

Scope of delivery

		11W	Vitronic 18W/24W/36W/55W
1	Unit head	1 x	1 x
2	Casing	1 x	1 x
3	Black stepped hose adapter with O ring – Ø 19 ... 38 mm (Ø ¾ ... 1½ in)	2x	–
4	Transparent stepped hose adapter with union nut and flat seal – Ø 25 ... 38 mm (Ø 1 ... 1½ in)	–	2 x
5	UVC lamp	1 x	1 x
6	Hose clip 20 ... 32 mm	–	2 x
7	Hose clip 35 ... 50 mm	–	2 x

Function description

The special UVC radiation of the UVC clarifier eliminates floating algae and other algae that give water a green colour. It also kills bacteria and other germs. The UVC clarifier is integrated in the water circuit, ideally upstream of a filter.

Intended use

Vitronic, referred to in the following as "unit", may only be used as specified in the following:

- For cleaning garden ponds.
- For operation with clean water.
- Operation under observance of the technical data.

The following restrictions apply to the unit:

- Never use the unit to convey fluids other than water.
- Never run the unit without water.
- Never operate the UVC lamp outside the casing or use it for any other purposes. The UVC radiation is harmful to the eyes and skin even in small doses.
- Do not use for commercial or industrial purposes.
- Do not use in conjunction with chemicals, foodstuff, easily flammable or explosive substances.

Safety information

Hazards to persons and assets may emanate from this unit if it is used in an improper manner or not in accordance with its intended use, or if the safety instructions are ignored.

This unit can be used by children aged 8 and above and by persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they are supervised or have been instructed on how to use the unit in a safe way and they understand the hazards involved.

Do not allow children to play with the unit.

Only allow children to carry out cleaning and user maintenance under supervision.

Hazards encountered by the combination of water and electricity

- The combination of water and electricity can lead to death or severe injury from electrocution, if the unit is incorrectly connected or misused.
- Prior to reaching into the water, always switch off the mains voltage to all units used in the water.

Correct electrical installation

- Electrical installations must meet the national regulations and may only be carried out by a qualified electrician.
- A person is regarded as a qualified electrician if, due to his/her vocational education, knowledge and experience, he or she is capable of and authorised to judge and carry out the work commissioned to him/her. This also includes the recognition of possible hazards and the adherence to the pertinent regional and national standards, rules and regulations.
- For your own safety, please consult a qualified electrician.
- The device may only be connected if the electrical data of the device and the power supply coincide. The device data is to be found on the device type plate, on the packaging or in this manual.
- Ensure that the unit is fused for a rated fault current of max. 30 mA by means of a fault current protection device.
- Extension cables and power distributors (e.g. outlet strips) must be suitable for outdoor use (splash-proof).
- Minimum safety distance between the unit and the water: 2 m.
- Protect the plug connections from moisture.
- Only plug the unit into a correctly fitted socket.

Safe operation

- Never operate the unit if either the electrical cables or the housing are defective!
- Do not carry or pull the unit by its electrical cable.
- Route cables/hoses such that they are protected from damage and do not present a tripping hazard.
- Only open the unit housing or its attendant components, when this is explicitly required in the operating instructions.
- Only carry out work on the unit that is described in this manual. If problems cannot be overcome, please contact an authorised customer service point or, when in doubt, the manufacturer.
- Only use original spare parts and accessories for the unit.
- Never carry out technical modifications to the unit.
- Power connection cables cannot be replaced. If a cable is damaged, dispose of the respective unit or components.
- Only operate the unit if no persons are in the water.
- The unit, the connections and plugs are not water-proof and must not be routed or installed in water.
- Keep the socket and power plug dry.

Installation and connection

Prerequisite

- The unit head is removed. (→ Removing the unit head)

Set-up the unit

How to proceed:

B, C

- Install the unit at least 2 m from the edge of the pond.
- Only install the unit in the permitted positions to ensure fault-free operation.
- Allow sufficient space for carrying out maintenance work.

Connect the unit

Use hoses that are suitable for a pressure of at least 1 bar.

How to proceed:

D

Shorten the stepped hose adapter to the diameter of the hose used if necessary.
– This reduces pressure losses.

Slip the hose clip over the hose, fit the hose onto the hose connector and secure with the hose clip.
– In the case of a stepped hose adapter with separate union nut, first push the union nut over the hose.

Connect the stepped hose adapter with seal to the casing.

- Connect the inlet and outlet.
- Hand tighten the stepped hose adapter.

Connect the unit to the flow-through filter.

Vitronic 18 W / 24 W / 36 W

The unit is suitable for connection to flow-through filters. Both outlet sockets are screwed to the inlet nozzles on the flow-through filter. Adhere to the instructions for use of the flow-through filter.

How to proceed:

E

Unscrew the cover cap.

Guide the outlet sockets with flat seal through both holes in the container wall of the flow-through filter.

Screw the inlet nozzle with O ring onto the outlet socket and hand tighten.

Connect the supply hose to the inlet socket. (→ Establish connections)

Commissioning/start-up

Attention! Dangerous electrical voltage.

Possible consequences: Death or severe injury.

Protective measures:

- Prior to reaching into the water, switch off the mains voltage to all units used in the water.
- Switch off the mains voltage prior to carrying out work on the unit.

Prerequisite

- Switch the pump on first, then switch on the UVC clarifying unit.
- Check all connections for leaks.

Switching ON/switching OFF

- **Switching on:** Insert the power plug into the socket.
– The unit switches on immediately.
- **Switching off:** Disconnect the power plug.

Check the function.

Vitronic 11 W

F

- The function display is lit when the UVC lamp is switched on.

Vitronic 18 W / 24 W / 36 W / 55 W

G

- The function display is lit when the UVC lamp is switched on.
- The transparent stepped hose adapters are lit when the UVC lamp is switched on.

Remedy of faults

Malfunction	Cause	Remedy
The performance of the unit is not satisfactory	The water is extremely soiled	Remove algae and leaves from the pond, change the water
	The quartz glass is soiled	Clean the quartz glass
	The UVC lamp capacity is exhausted	The lamp must be replaced after 8000 operating hours
	Flow rate is too high	Reduce the pump output
UVC lamp is not lit	Power plug not connected	Connect power plug
	UVC lamp defective	Replace the UVC lamp
	Connection defective	Check electrical connection
	UVC overheated	Vitronic 55: UVC automatically switches on when it has cooled down

Wear parts

The following components are wear parts and are excluded from the warranty:

- UVC lamp, quartz glass and O ring for quartz glass

Maintenance and cleaning

Attention! Dangerous electrical voltage.

Possible consequences: Death or severe injury.

Protective measures:

- Prior to reaching into the water, switch off the mains voltage to all units used in the water.
- Switch off the mains voltage prior to carrying out work on the unit.

Cleaning the unit

Note!

Recommendation on regular cleaning:

- Clean the pump as required but at least twice a year.
- Do not use aggressive cleaning agents or chemical solutions as they could attack the housing or impair the function of the unit.
- Recommended cleaning agent for removing stubborn limescale deposits:
 - Pump cleaning agent PumpClean from OASE.
 - Vinegar- and chlorine-free household cleaning agent.
- After cleaning, thoroughly rinse all parts in clean water.

Dismantling the unit head

Attention! Ultra-violet radiation.

Possible consequences: Eye or skin injury from burns.

Protective measures:

- Never operate the UVC lamp outside its housing.
- Never operate the UVC lamp in a housing that is defective.

Attention! Breakable glass.

Possible consequences: Injury to your hands caused by cuts.

Protective measures: Handle the quartz glass and UVC lamp with care.

Vitronic 11 W

How to proceed:

H

Turn the unit head counter-clockwise up to the stop and carefully pull it out of the casing together with the O ring.

- Thoroughly clean the inner and outer surfaces of the casing.

Vitronic 18 W / 24 W / 36 W / 55 W

How to proceed:

I

Press the engagement hooks.

Turn the unit head counter-clockwise as far as the stop and carefully pull it out of the casing.

- Thoroughly clean the inner and outer surfaces of the casing.

Note!

For safety reasons the UVC lamp can only be switched on when the unit head has been correctly fitted into the casing.

Fitting the unit head

Vitronic 11 W

How to proceed:

J

Check the O ring at the unit head for correct seating.

- Clean the O ring, replace if damaged.

Carefully push the unit head into the casing up to the stop while applying slight pressure.

- Turn the unit head slightly so that the tenons and grooves of the bayonet closure intermesh.

Turn the unit head clockwise up to the stop.

- The two arrows on the casing and unit head must point towards one another.

Vitronic 18 W / 24 W / 36 W / 55 W

How to proceed:

K

Check the O ring at the unit head for correct seating.

- Clean the O ring, replace if damaged.

Carefully push the unit head into the casing up to the stop while applying slight pressure.

- Turn the unit head slightly so that the tenons and grooves of the bayonet closure intermesh.

Turn the unit head clockwise up to the stop.

Cleaning the quartz glass / Replacing the UVC lamp

Replace the UVC lamp after max. 8,000 operating hours (this corresponds to approx. one pond season with continuous operation). This ensures optimum filtering performance.

Attention! Breakable glass.

Possible consequences: Injury to your hands caused by cuts.

Protective measures: Handle the quartz glass and UVC lamp with care.

Prerequisite

- The unit head is removed. (→ Removing the unit head)
- Only use UVC lamps whose identification and capacity data correspond to the information on the type plate. (→ Technische Daten)

How to proceed:

L

Loosen the self-tapping screw until the the screw tip is sunk in the housing of the clamping screw.

Unscrew the clamping screw counter-clockwise.

Remove the quartz glass including the O ring towards the front with a slight turning movement.

Pull out the UVC lamp and replace.

Push the quartz glass including the O ring as far as the stop in the unit head.

- Clean the O ring, replace if damaged.
- Ensure that the O ring is located in the gap between the unit head and the quartz glass.

Tighten the clamping screw clockwise up to the stop.

Tighten the self-tapping screw.

Wipe the quartz glass tube with a damp cloth

Storage/Over-wintering

Remove the unit at temperatures below zero degrees centigrade. Thoroughly clean and check the unit for damage.

Disposal

Do not dispose of this unit with domestic waste! For disposal purposes, please use the return system provided.
Disable the unit beforehand by cutting off the cables.

Dispose of the UVC lamp by using the return system provided for this purpose.
